

## Brain Writing

Brain writing is a technique used to prime the brains and get the wheels spinning. It encourages crappy ideas and creativity!

Here is how to play:

- Give students 3 words
- Give students 2 adjectives
- Give students 1 noun
- Students then have a certain amount of time to come up with as many sentences as they can with those words
  - The goal is to come up with as many sentences as possible! quantity over quality.
- Each student can share a sentence with the class.
- Encourage students to share a sentence with the class.

After you have all crazy 8 sketches:

- Reflect of common sentences or unique sentences
- Reflect on how it feels to have no bad ideas and just go for quantity
- Reflect on if it was difficult or hard with the words selected or with the time limit.
