UNMUTE AND SAY HELLO

- 1 Share your name and pronouns
- 2 School and course
- 3 A hobby or talent you have

ISTC'S MISSION

- 1 Foster inclusive STEM talent pipeline within Illinois
- 2 Break down barriers to traditional mentoring
- 3 Connect industry to classrooms

THE STEM CHALLENGE PROGRAM

STEM Challenges are real-world projects that allow high school students to work alongside STEM professionals. Students and mentors from industry partners collaborate over four months to explore, create, and build innovative solutions.

Company employees support student learning as mentors - providing expertise and feedback both in-person and virtually through our **Mentor Matching Engine®** platform.

TIMELINE

CHALLENGE STATEMENTS

- Authentic industry problem
- The starting point for students
- No 1 right answer to these problems
- 2 versions
 - Challenge Statement
 - Student Letter

Baxter Challenge 2022-23

Every day, millions of patients and caregivers rely on Baxter's leading portfolio of critical care, nutrition, renal, hospital and surgical products. For more than 85 years, we've been operating at the critical intersection where innovations that save and sustain lives meet the healthcare providers that make it happen. With products, technologies and therapies available in more than 100 countries, Baxter's employees worldwide are now building upon the company's rich heritage of medical breakthroughs to advance the next generation of transformative healthcare innovations.

Baxter also strives to make a meaningful difference in the lives of people who depend on their products, and in the communities where our employees live and work. The Baxter International Foundation helps advance our mission by partnering with organizations around the world to increase access to healthcare for the underserved, develop the next generation of innovators who will lead the way in advancing healthcare and to create a long-lasting impact in communities globally.

Given the COVID pandemic, telehealth and access to at home care has been accelerated beyond what patients have experienced in the past. Telehealth is the distribution of health-related services and information via electronic information and telecommunication technologies. It allows long-distance patient and clinician contact, care, advice, reminders, education, intervention, monitoring, and remote admissions. Telehealth can include utilizing computers, mobile Devices, TVs, and remote monitoring devices.

Baxter has been a leader in telehealth and continues to be a global innovator when it comes to at home care. Baxter launched AMIA with SHARESOURCE, the first Automated Peritoneal Dialysis (APD) system with user-friendly features that help guide end-stage renal disease patients through home peritoneal dialysis (PD) therapy, while keeping them remotely connected with their healthcare providers. The use of water in this therapy and in many of their other products and manufacturing makes Baxter keenly aware of the importance of water in their work

KEEP IN MIND

- Phases
 - Phase 1: Research
 - Phase 2: Synthesize
 - Phase 3: Iterate
 - Phase 4: Prototype
 - Phase 5: Pitch
- Familiar with document prior to the kick-off.
- You don't need to be the expert.

Challenge Statement:

You are being recruited to assist in the development of new technologies to improve patient health outcomes through telehealth and access to clean water. Select one of the following options and challenge yourself to think creatively about the possible solutions.

Option 1: As technology improves and patients become more active participants in their health, you are being tasked to create the Sharesource 3.0.

Phases

Phase 1: Understand the difference between telehealth, telecare, and telemedicine.

Phase 2: Explore how Sharesource is used currently to aid in patient care and treatment.

Phase 3: Explore patient engagement.

Phase 4: Storyboard your technology.

Phase 5: Pitch it!

Option 2: Expand Sharesource technology or alternative telehealth devices to personalize treatment for Diabetes and improve patient behaviors related to nutrition or exercise.

Phases

Phase 1: Understand the difference between telehealth, telecare, and telemedicine.

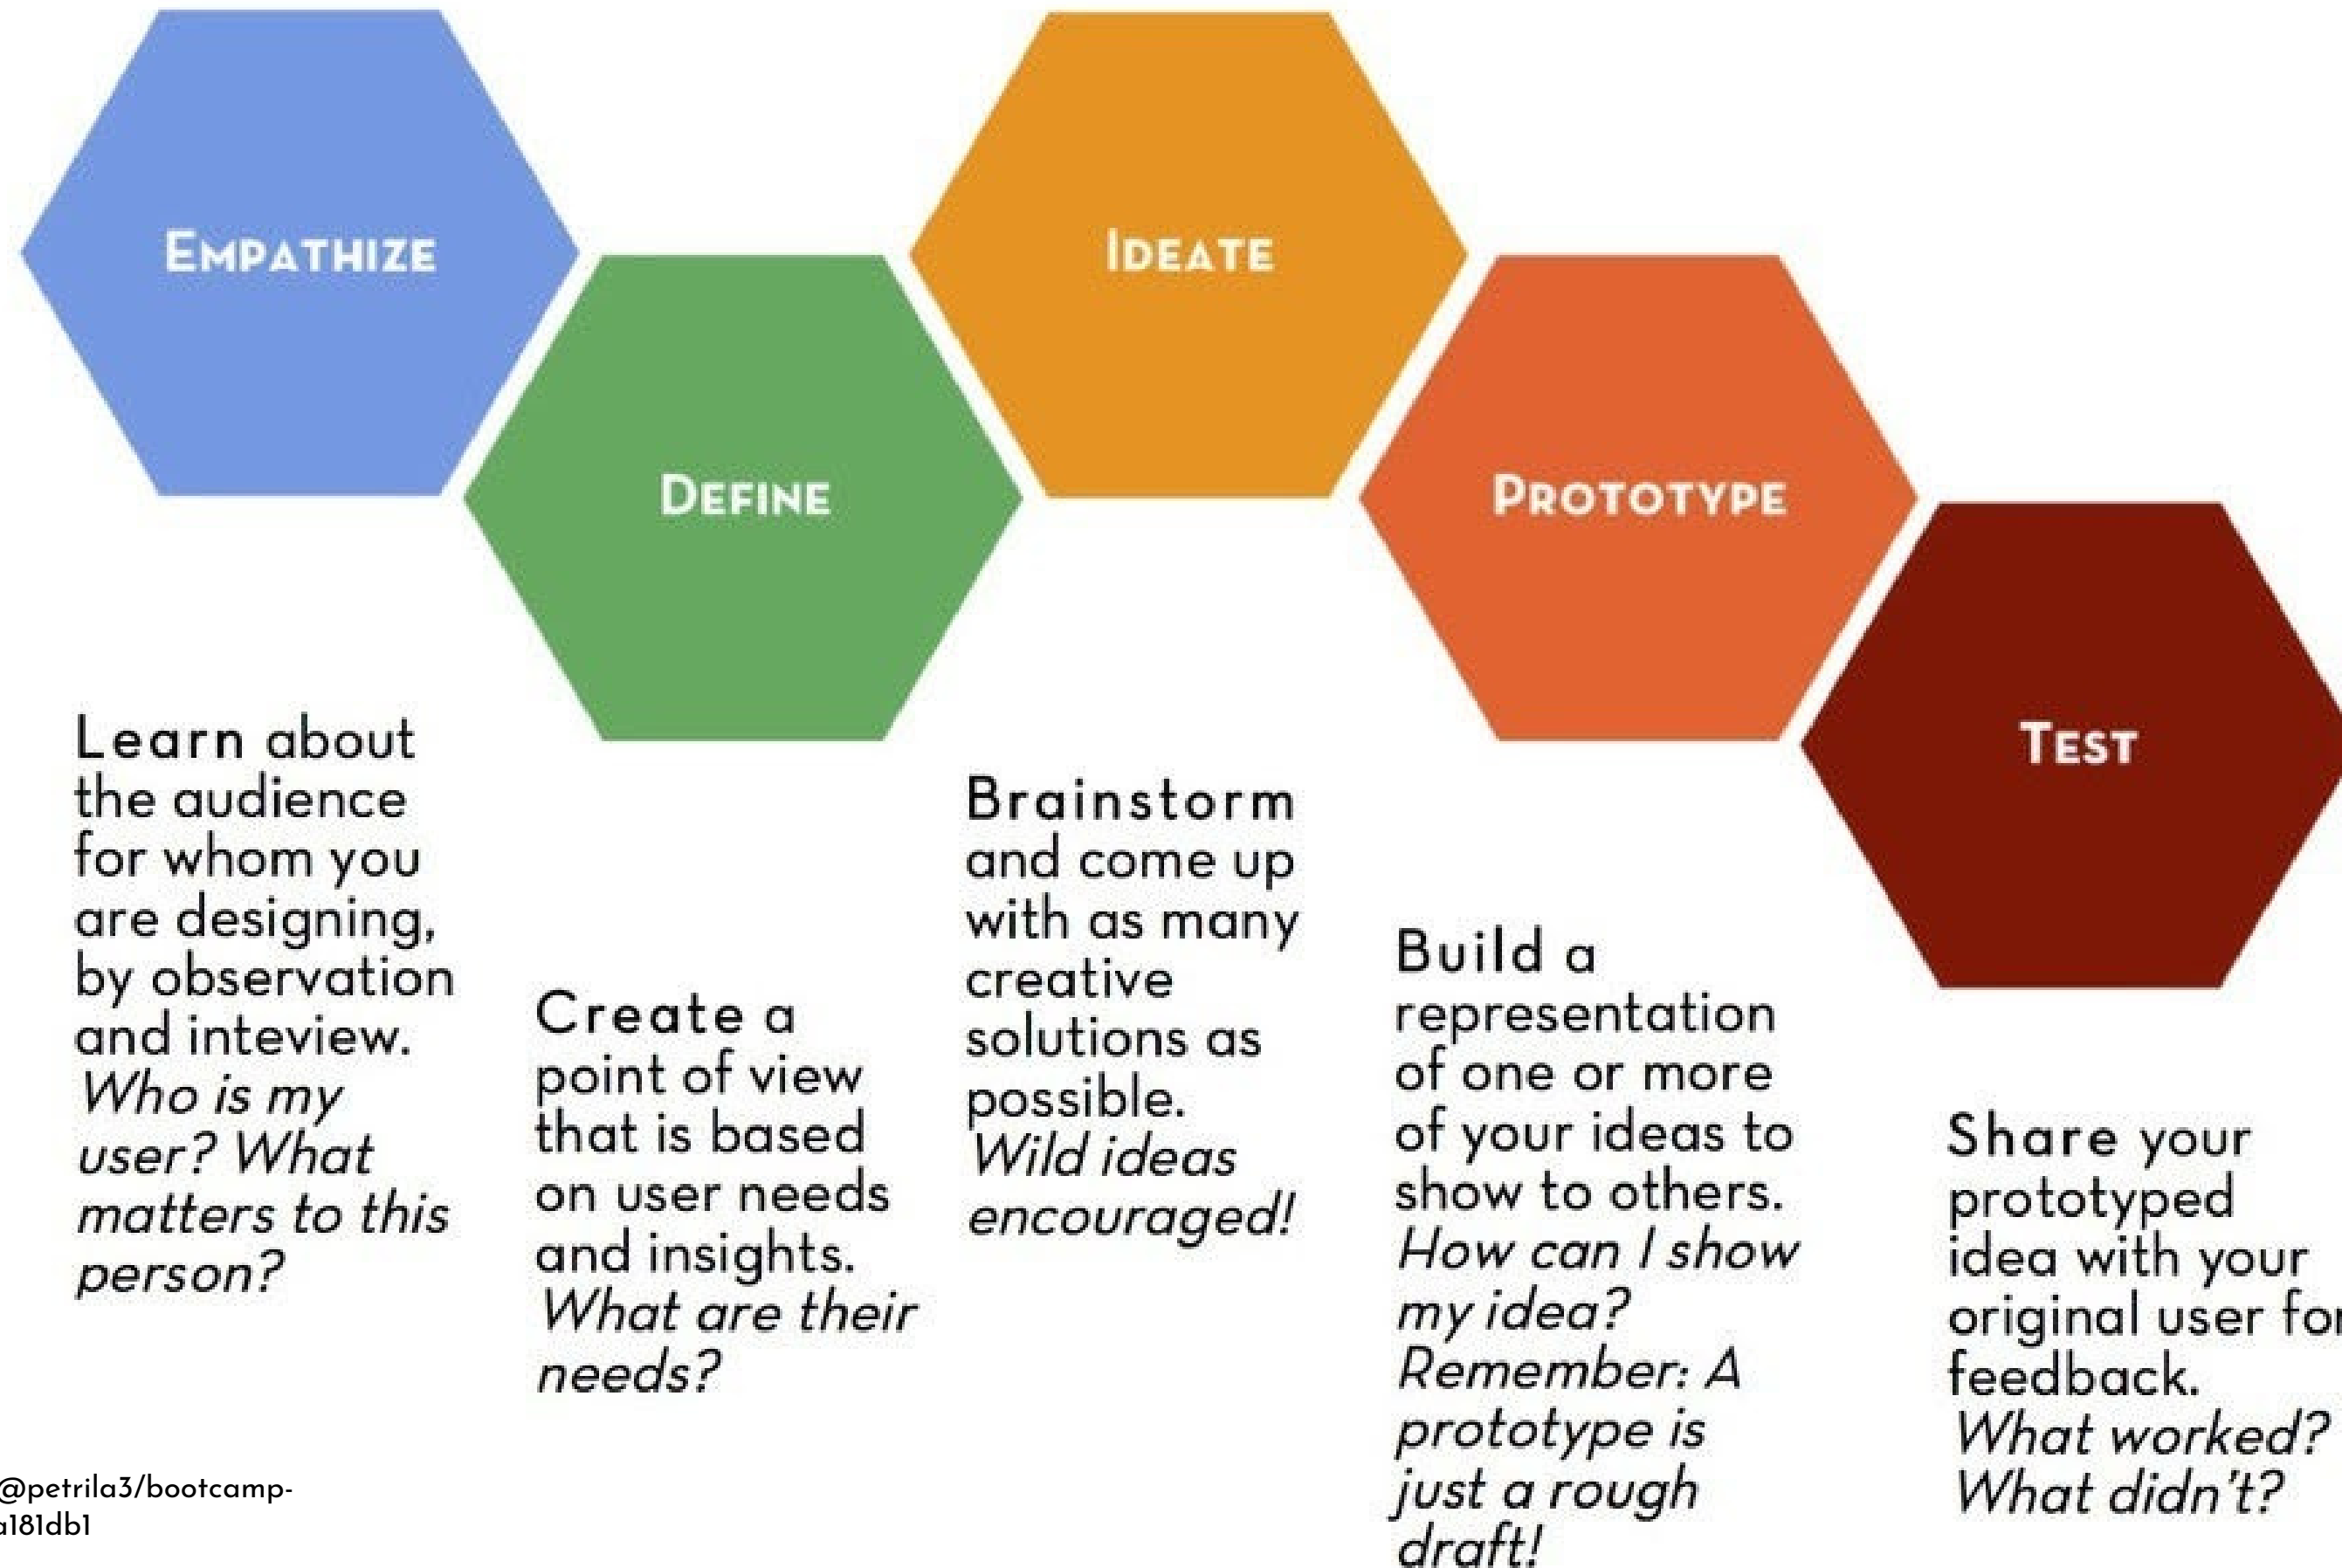

Phase 2: Explore how Sharesource is used currently to aid in patient care and treatment.

Phase 3: Research current treatments for Diabetes.

Phase 4: Explore patient engagement.

Phase 5: Storyboard your technology.

Design Thinking

The Mentor Matching Engine

The Mentor Matching is an online platform that connects students and teachers with their partner company and mentors.

- 1 Teacher Onboarding
- 2 Onboarding Students
- 3 Student project Creation
- 4 Teacher Approval
- 5 Creating Groups
- 6 Tracking Weekly Communication

Resource Alert : [Onboarding Checklist](#)

GETTING ON THE MENTOR MATCHING ENGINE

- Onboarding Students
- Student Project Creation
- Teacher Approval
- Mentors Matched

The screenshot displays a web interface with two main panels. The left panel, titled 'Projects (2)', shows '2 Matched' and contains a white square icon and a green circle icon. The right panel, titled 'New Invitation', includes a text input field for 'Email addresses', a dropdown menu for 'Role *', and two buttons: 'Invite' (red) and 'Cancel' (grey).

TEACHER TOOLKIT

- From Video Demos to communication tools, and everything in between. Don't see what you need? Let us know!

TEACHER TOOLKIT

SETTING UP FOR SUCCESS

ISTC is here to guide you in all aspects of the program!
From getting students up and ready to connect with
mentors and beyond, please reach out with any and all
questions.

Most
important

1.

**LETTER OF
COMMITMENT**

2.

COMMUNICATION

3.

**STEPS TO
ONBOARD**

LETTER OF COMMITMENT

- Your school signed up to participate with a specific amount of projects. ISTC uses the Letter of Commitment as a broad guide to begin recruiting mentors.
- As you begin to plan your course, know that you can't exceed this number, but you can fall beneath it.

KEY PLAYERS IN COMMUNICATION

Teacher

Role: Teammates with the mentor!
Goal: Developing workforce and real-world skills in the student.

ISTC Staff / Coach

Role: Point of contact for any planning or breakdown in the project process.
Goal: ISTC aims to support all parties through the mentoring process.

Mentor

Role: Primary resource for students.
Goal: Support process and create bridge beyond high school.

Student

Role: Students are the primary communicators and the project leads.
Goal: Build agency.

COMMUNICATION IS KEY

Students and Mentors

Expectation: Weekly communication. If your classroom will be communicating less frequently than that, establish it either in the research details or in the very first post.

Students and Mentors
(Again!)

Communication schedule: (STEM Fridays, Mentor Mondays). They should tell their mentor when they plan to post.

Teachers and ISTC

Monthly emails: Updates, deadlines, important tasks and awards!

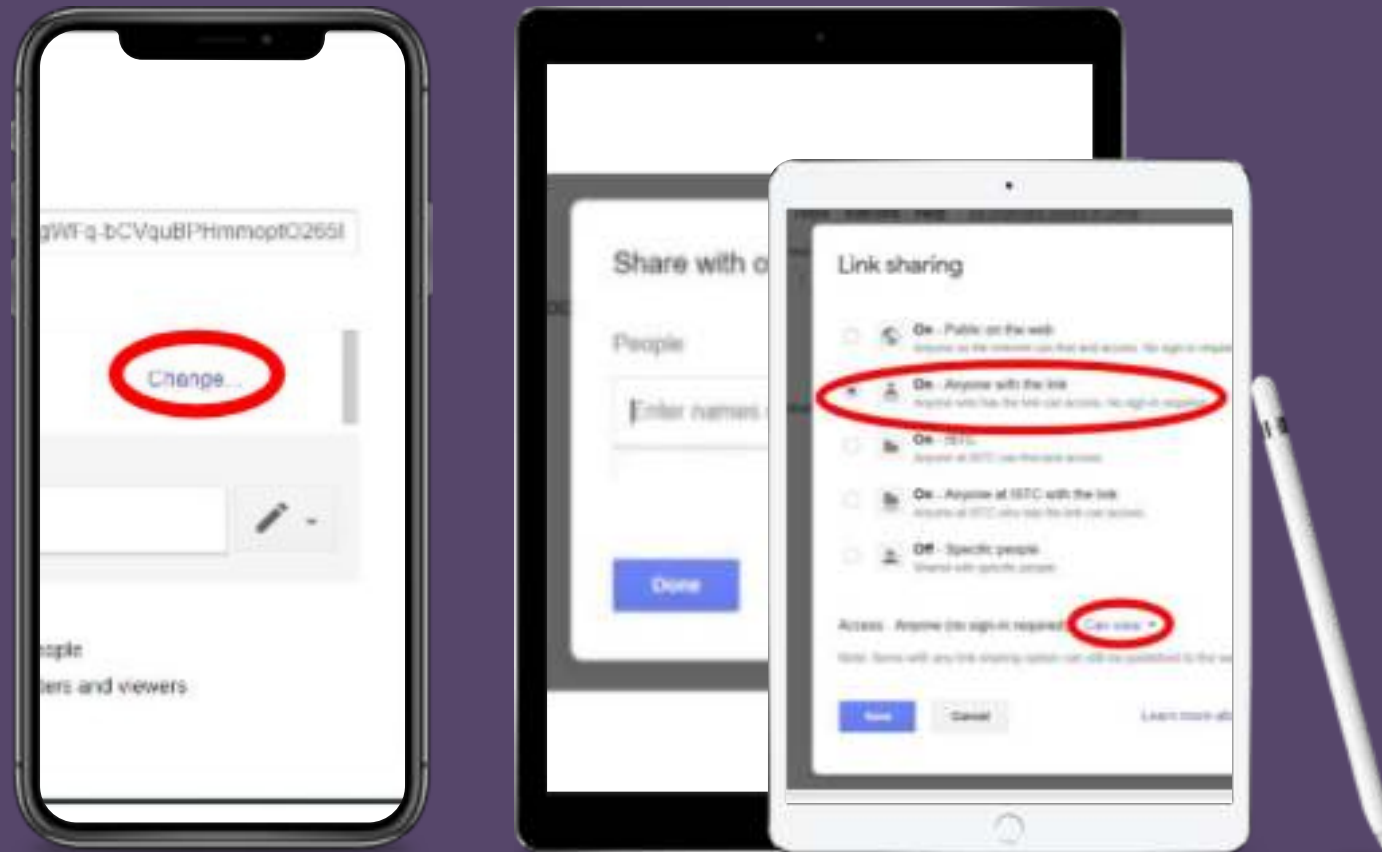

ISTC CHECK INS AND SUPPORT

ISTC will communicate via monthly emails and supplemental connection points when the following occur:

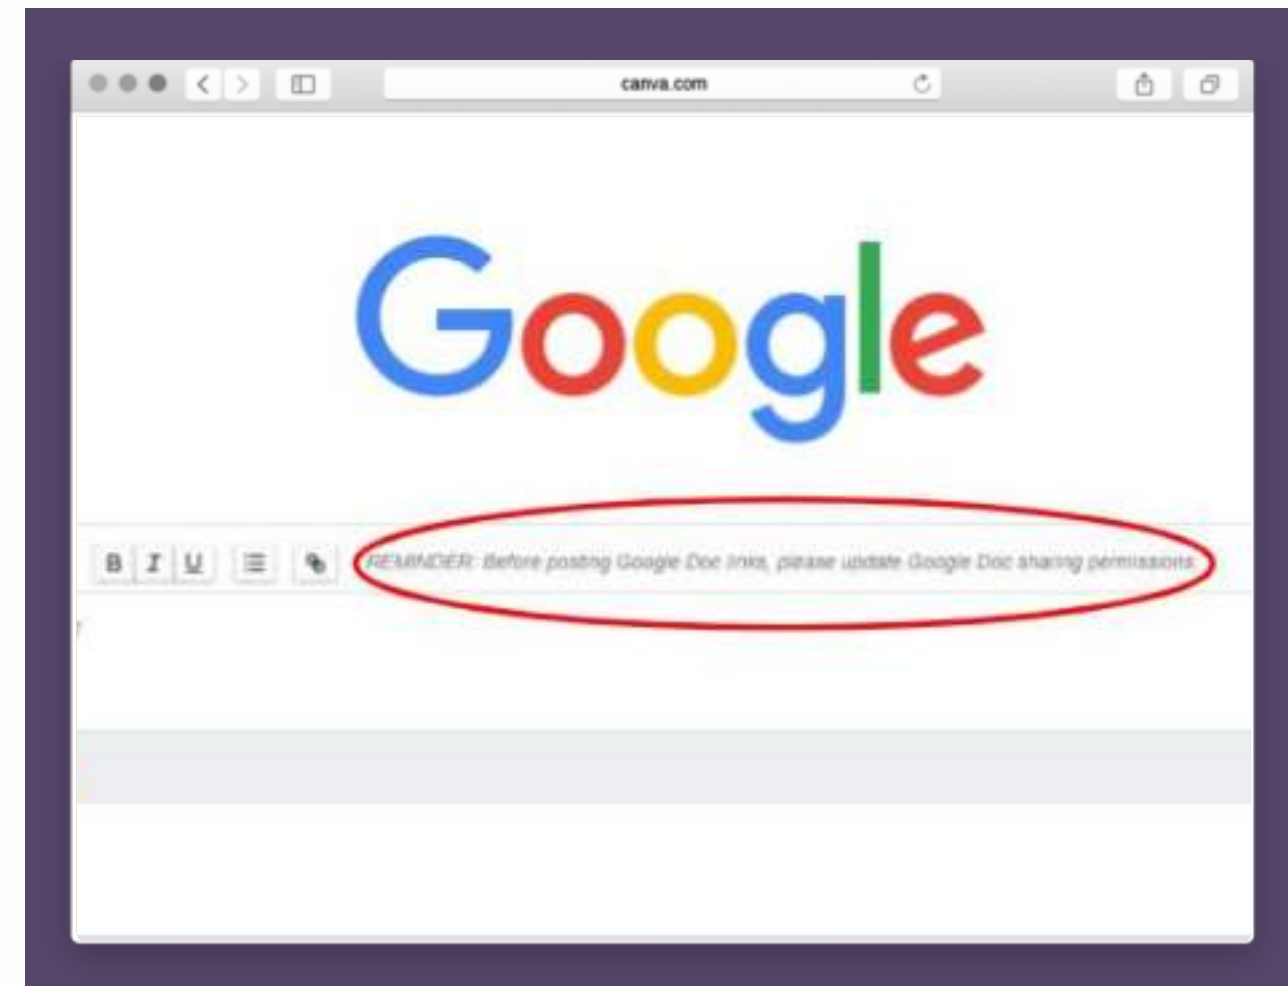

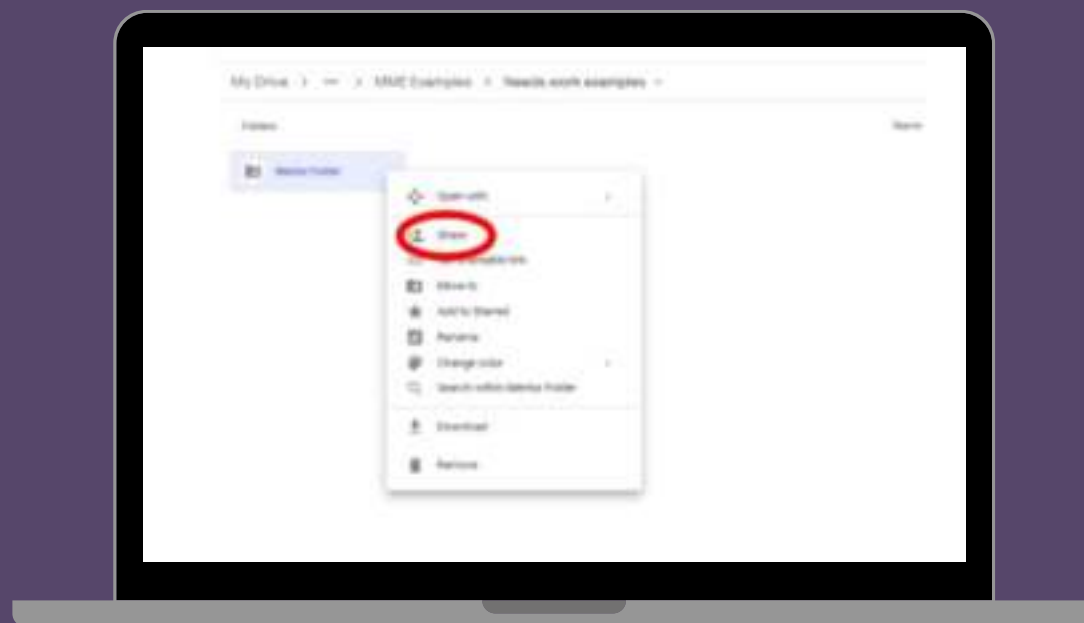

- Milestone Planning
- Necessary Nudge (Break in communication)
- Security Precaution

GOOGLE LINK SHARING

- When posting links, PLEASE ensure that link sharing settings are set to "Anyone with the link can view".
- (Depending on your school's security guidelines for student accounts, you may need to open link sharing for them)

TEACHER COMMUNICATION

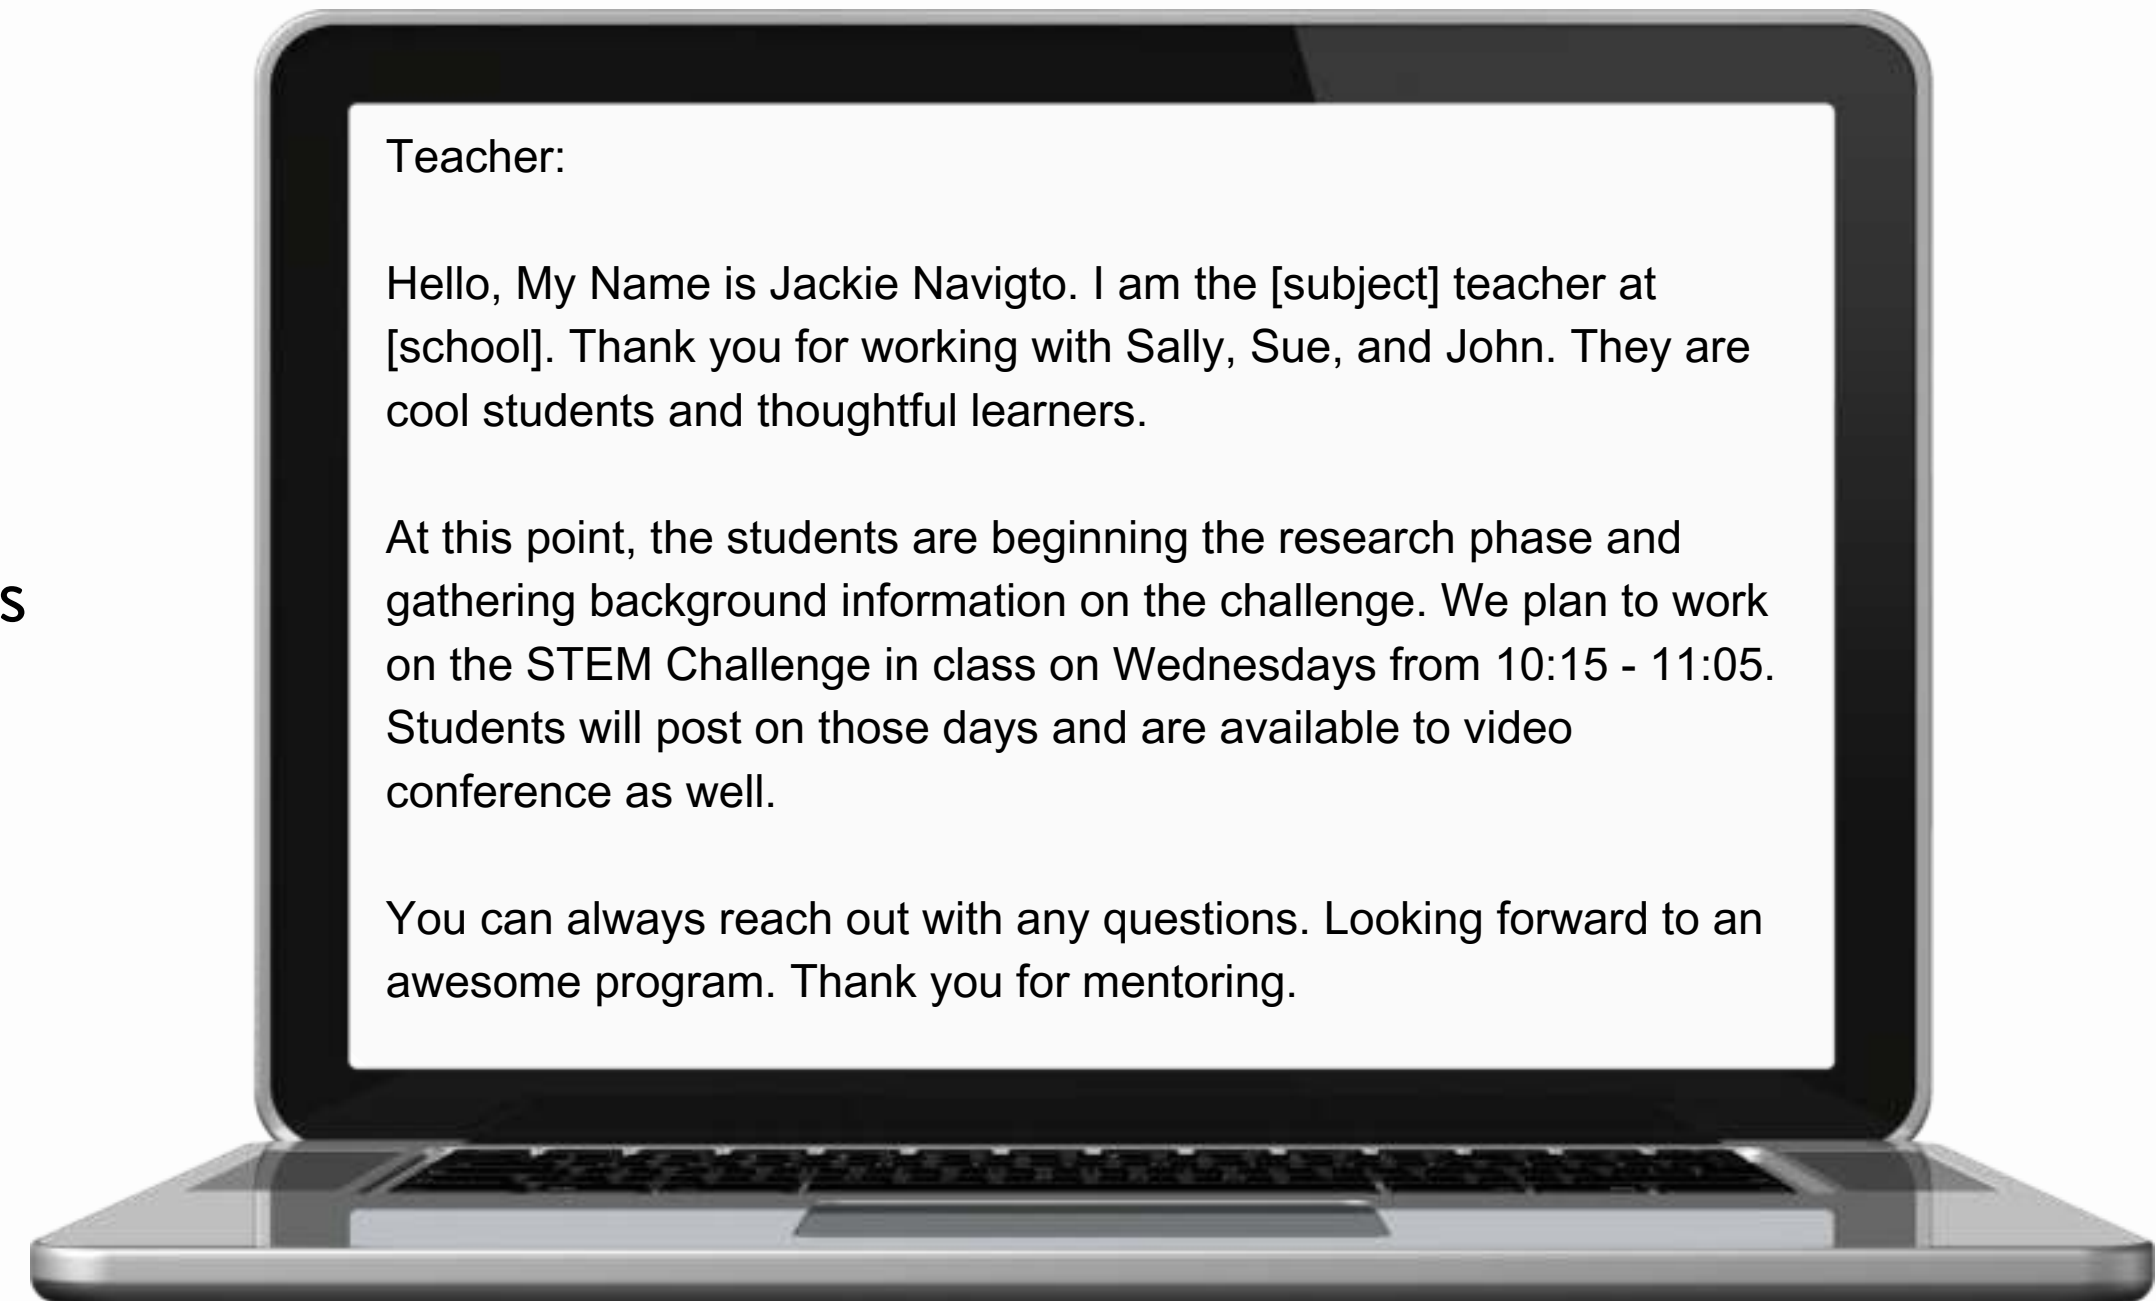

How to utilize your mentor as a teammate:

- 1** First Post to Mentors
Say hello, introduce yourself, and set the tone.
- 2** Check-ins with Students
Continue to establish oversight.
- 3** Direct Communication
Use the Participants tab and reach out.

TEACHER FIRST POST

- Some form of first post is required
- Teacher first post establishes a line of communication
 - Parameters and expectations
 - Establish Routine
- Mentors appreciate this! Context is always helpful!
 1. Introduces the course
 2. Timeline
 3. Routine/expectations
 4. Establishing oversight and direct line of communication

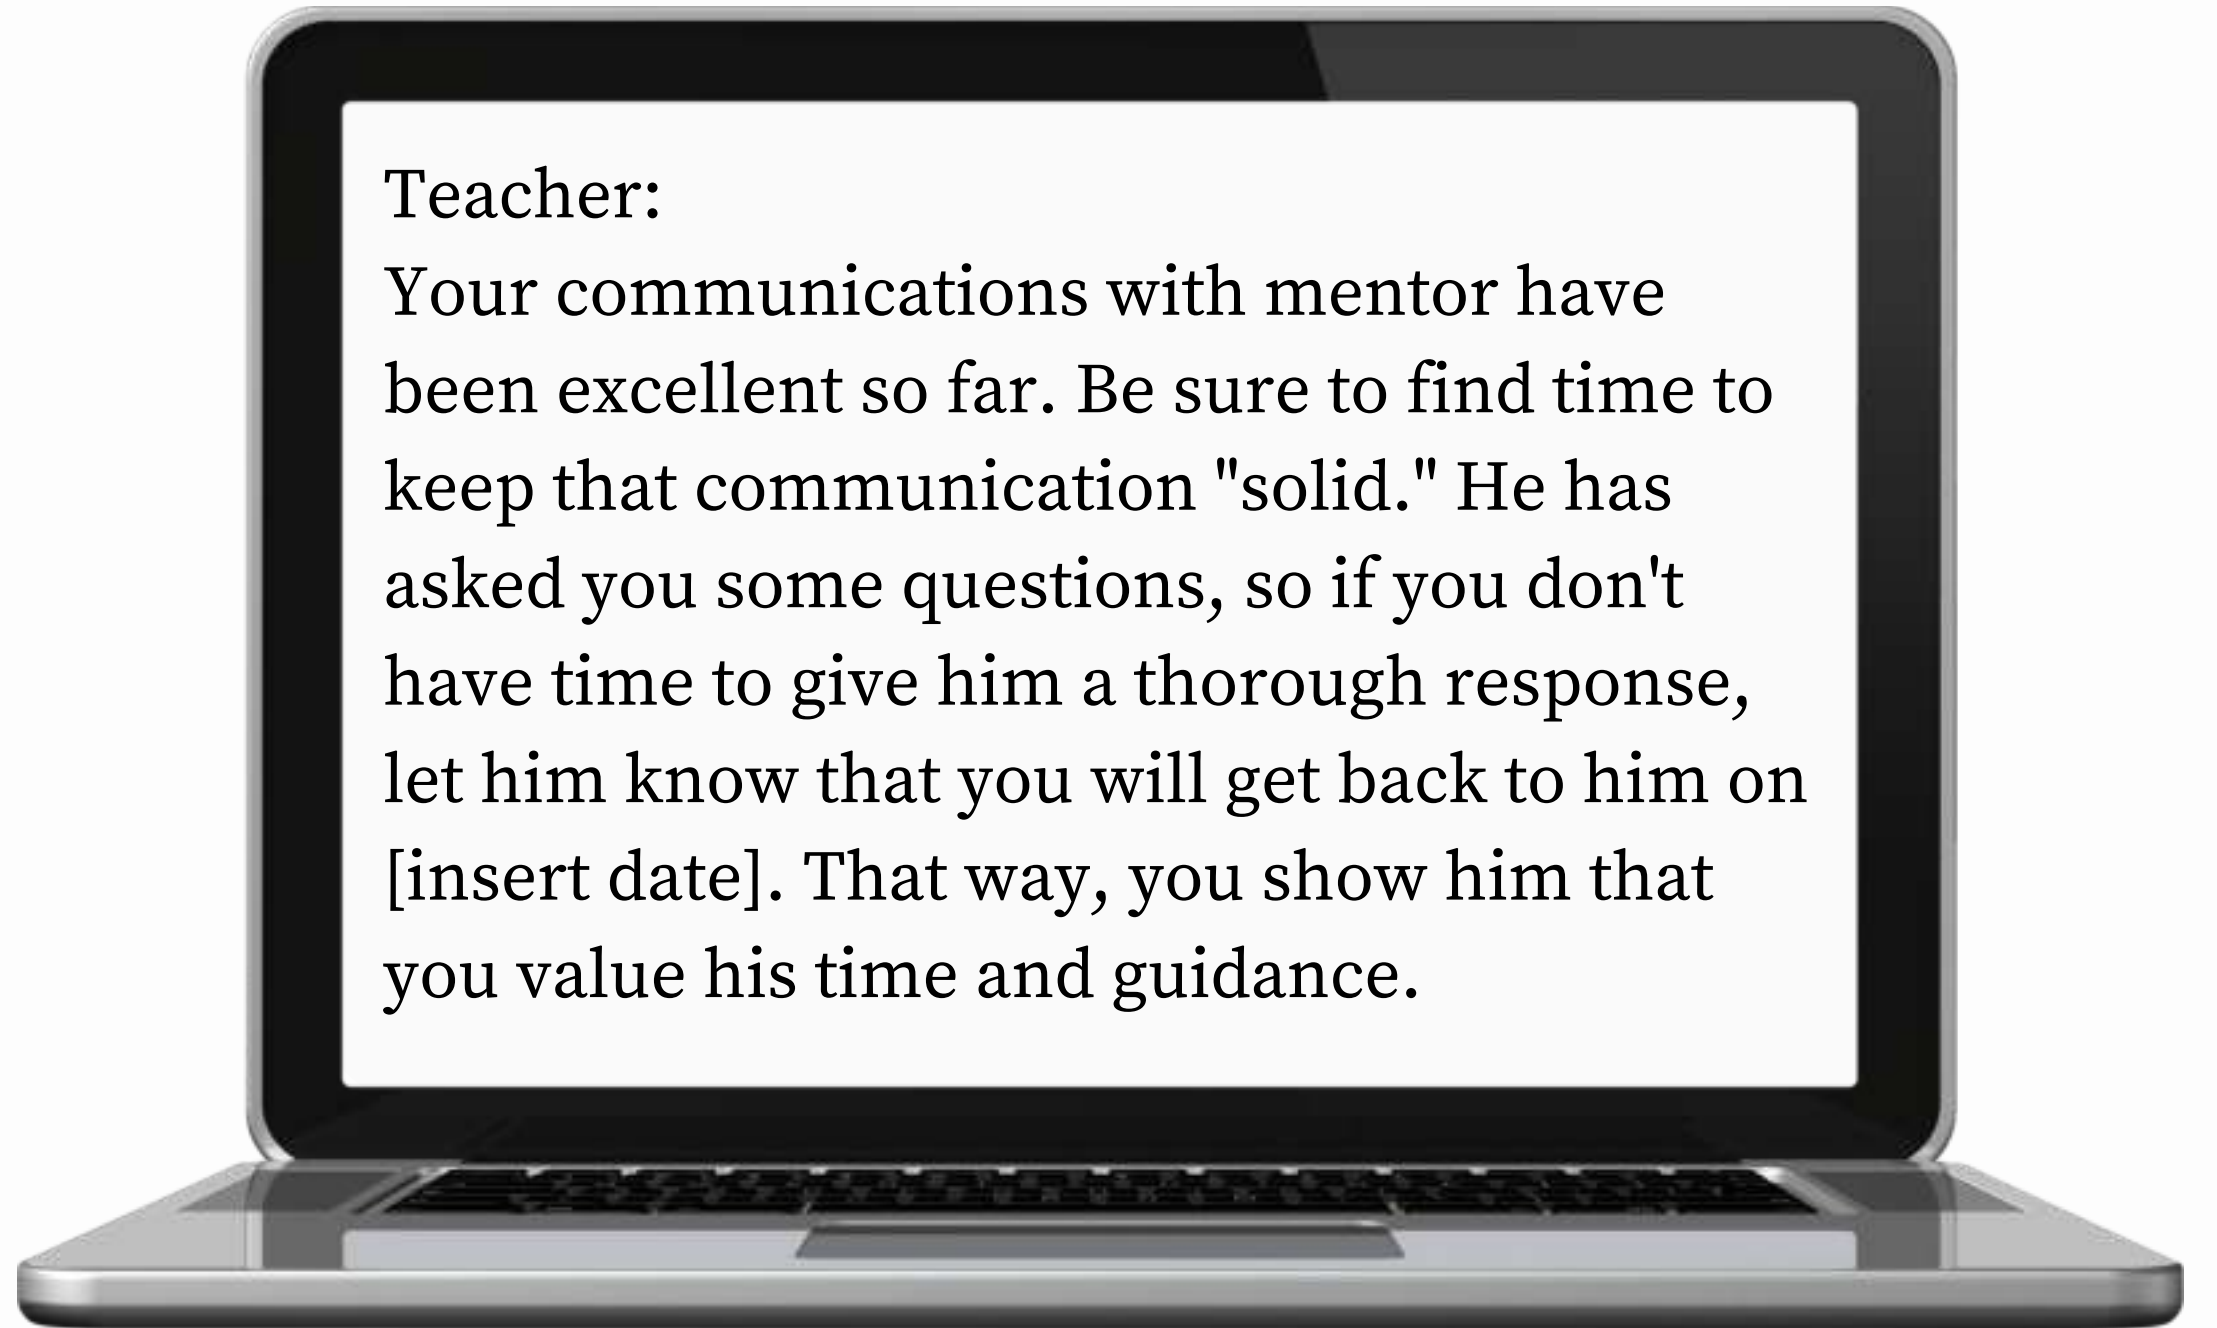

CHECK INS

Checking in with your student over MME in addition to in person/in class time signals to the mentor that there is movement within the project.

Teacher:

Your communications with mentor have been excellent so far. Be sure to find time to keep that communication "solid." He has asked you some questions, so if you don't have time to give him a thorough response, let him know that you will get back to him on [insert date]. That way, you show him that you value his time and guidance.

DIRECT OUTREACH

- You can send messages directly to the mentor through the Participants tab.
 - These messages will be delivered directly to their email inbox.

ONBOARDING

Some stellar tips and tricks to prepare your students

1.

**BEFORE
KICKOFF**

Preparing the students for the mentorship journey ahead!

2.

**DURING
KICKOFF**

Strategies to help break the ice and get the ball rolling!

3.

**FIRST
STUDENT POST**

Students should post within 1 week of meeting their mentors. (unless otherwise communicated)

1. BEFORE KICK OFF

INVITE STUDENTS

Get your students on the platform

CREATE PROJECTS

One student, or the teacher, can create projects. The teacher will approve and add in the students according to groups.

BRAINSTORM QUESTIONS

Students brainstorm questions for their mentors either on the challenge statements or otherwise

2. DURING KICKOFF

COMPANY OVERVIEW

Have mentors introduce their company to the students

ICE BREAKING GAME

Mock up and other ice breaking activities can go a long way to facilitating a strong mentor - mentee connection

MENTOR/STUDENT INTROS

Create structure for how you would like mentors and students to introduce themselves. Consider doing intro slides, speed interviews or other activities to assist

3. FIRST STUDENT POST

After mentors have been matched into students' projects post kickoff, the student will post as soon as possible.

Essentials

- Project details: Context, timeline, deliverables
- Response to something discussed as kick-off
- How can the mentor best support you?
- Ask specific questions

STUDENT:

Hi, our names are Sally, Sue, and John. It is a pleasure to have this experience with you and to learn more about your work at Lenovo. We are interested in exploring how AI can enhance human efficiency. With your background, I would love to gain more information about Lenovo and the work you are doing there. At the moment, we are just starting our research. My next challenge is to more clearly define the problem. My final project is due around the end of April. However, for a heads-up, I will be out of town in mid-March so I will be unable to communicate then. Thank you for agreeing to be my mentor, and I am excited for the process!

MONITORING AND ONGOING COMMUNICATION

Monitoring

Establishing a pattern of communication (Mentor Monday, STEM Fridays); Nudging online

Nudging and Updates

Students can nudge their mentors as well! Mentors are full time employees, parents, etc. Sending a quick follow up message to hold them accountable is both efficient and a good skill for students to practice

Final Stages

Thanking the mentor, sharing final product, & keeping in touch

TEACHER TRACKING TEMPLATE

- Strategies to manage the different projects
 - Stay on top of each group
 - Understand who might need extra support

Project	Notes	Last Posts	# Students	Mentors	Students	Focus Area Topic
Microsoft Mentor - Team Speakers	Everything looks great!	2/28	4			Transportation in Chicago - efficiency & more carbon credits
Microsoft Challenge - Team Horchata	Student post needed: please remind your student to post on MME.	2/1	3			Transportation and carbon offsets. Posted slide deck for presentations.
Microsoft Challenge - team CB	Student post needed: please remind your student to post on MME.	2/24	4			Fast Fashion and impact on water

*inquire about templates more aligned with grading communication consistency

MME EMAILS

- Safety - You will receive automated emails from MME...
 - every time a student or mentor posts on MME
 - when a video conference has been scheduled
- Monitoring - You will receive automated reminders from MME...
 - If there has been no communication or movement within a project for 14 days, 21 days, and 25 days (students, mentors, and ISTC will also be notified)
 - If there has been no movement within a project for 28 days, the project will be archived
- ISTC Support with monitoring

STEM CHALLENGE SHOWCASE

FINAL HIGHLIGHTS

01 **Communication!**

We are here for you! We can't fix a problem we don't know about--please let us know if there's anything we can support with!

02 **Teacher Toolkit**

Please reference the teacher toolkit to find those wonderful worksheets to help guide your students through the STEM Challenge process and MME onboarding.

03 **First Posts**

Both teachers AND students will be making a first post on MME -- the more context for mentors, the better!

04 **Map out year**

Create a schedule for when students will be posting on MME or video conferencing weekly, what they should be working on, and support them in communicating this schedule with mentors.

GOALS OF TODAY!

- STEM Challenge program Refresher
- Setting up for success!
- Next Steps

IMPACT 2023-24

Students reported an increased confidence in their STEM and/or research skills

83% of students reported it was their first time working with a mentor.

THE STEM CHALLENGE PROGRAM

STEM Challenges are real-world projects that allow high school students to work alongside STEM professionals. Students and mentors from industry partners collaborate over four months to explore, create, and build innovative solutions.

Company employees support student learning as mentors - providing expertise and feedback both in-person and virtually through our **Mentor Matching Engine®** platform.

TIMELINE

Challenge Kick-offs

GOAL

STEM Challenges Students meet the mentors that they will be exploring, creating, and building innovative solutions. This is a time for mentors and students to break the ice and lay a strong foundation for the the mentorship to come.

Time Frame

November - January

Activities

- 1 Company Overview By Mentors
- 2 Mock ups
- 3 Mentor Introduction Slides
- 4 Ice breaker Games

Requirements

- 1 LOC Completed
- 2 Planning a Kickoff Form submitted (Due Nov 16th)
- 3 Kickoff agenda shared (1 week before)
- 4 Students on MME in Groups (1 week before)
- 5 Photo Releases from students

Mentor Visits and Virtual Engagement

GOAL

Facilitate connection point for students and mentors to build relationship and make progress on the project.

Activities

- 1 Standing calendar video conferences
- 2 Standing calendar in-person invitation
- 3 Routine posting days

Field Trips

GOAL

Time to take the classroom into the real world! Students may have the option to visit mentors at their office or visit a challenge-relevant site.

Time Frame

February - March

Activities

- 1 Field trips to Partner Company
- 2 Tour
- 3 Career Panel
- 4 Demos

Requirements

- 1 Planning a Mid-program submitted

Share Out

GOAL

Share outs are a chance for each student group to present their final solutions to their mentors. The goal of the Share out is for the mentors and teachers to provide final feedback and select the team(s) who will be representing their partnership at the final showcase. ISTC is process of product focus. We encourage mentors and teacher to select a group who does the best job explaining their journey of innovation and how they came to their solution, not just what it is.

Requirements

- 1 Planning a Share Out Form submitted
- 2 Rubric Shared

Time Frame

Late March - Early April

Showcase

GOAL

The state-wide showcase is a chance to celebrate mentorship and all the hard work our students have accomplished over the past year.

Student Presentations

- 1 5 minute pitch
- 2 5 minute Q&A
- 3 Visual Asset such as a PowerPoint on a laptop, poster, pamphlet, scale model, prototype

Activities

- 1 Student panel
- 2 Symposium-style student presentations
- 3 Networking lunch

Requirements

- 4 Select a presenting group
- 5 Register all your students and yourself
- 6 Communicate is assistance is need with transport, field trip approval, etc.

STEM CHALLENGE SHOWCASE

STEM CHALLENGE SHOWCASE

- ISTC's goal is to represent at least one group per teacher at the showcase
- Student Panel & Presentations
- Networking Practice
- Public Speaking Practice
- Culmination of a long project!
- Mentors and Teacher Select Presenting Group
 - Process over product!
- Teachers nominate panelist
- **Tentative Date: Tuesday, April 16th, 2024 at GOOGLE**

COMMUNICATION IS KEY

Students and Mentors

Expectation: Weekly communication. If your classroom will be communicating less frequently than that, establish it either in the research details or in the very first post.

Students and Mentors
(Again!)

Communication schedule: (STEM Fridays, Mentor Mondays). They should tell their mentor when they plan to post.

Teachers and ISTC

Monthly emails: Updates, deadlines, important tasks and awards!

GETTING UNSTUCK

Support your students through process!

- 1 Mentors in person
- 2 ISTC in person
- 3 Present your Mentor
- 4 Peer pitches

***Fostering an Innovative Mindset
W/ Marisol Rodriguez*

COMMUNICATION IS KEY

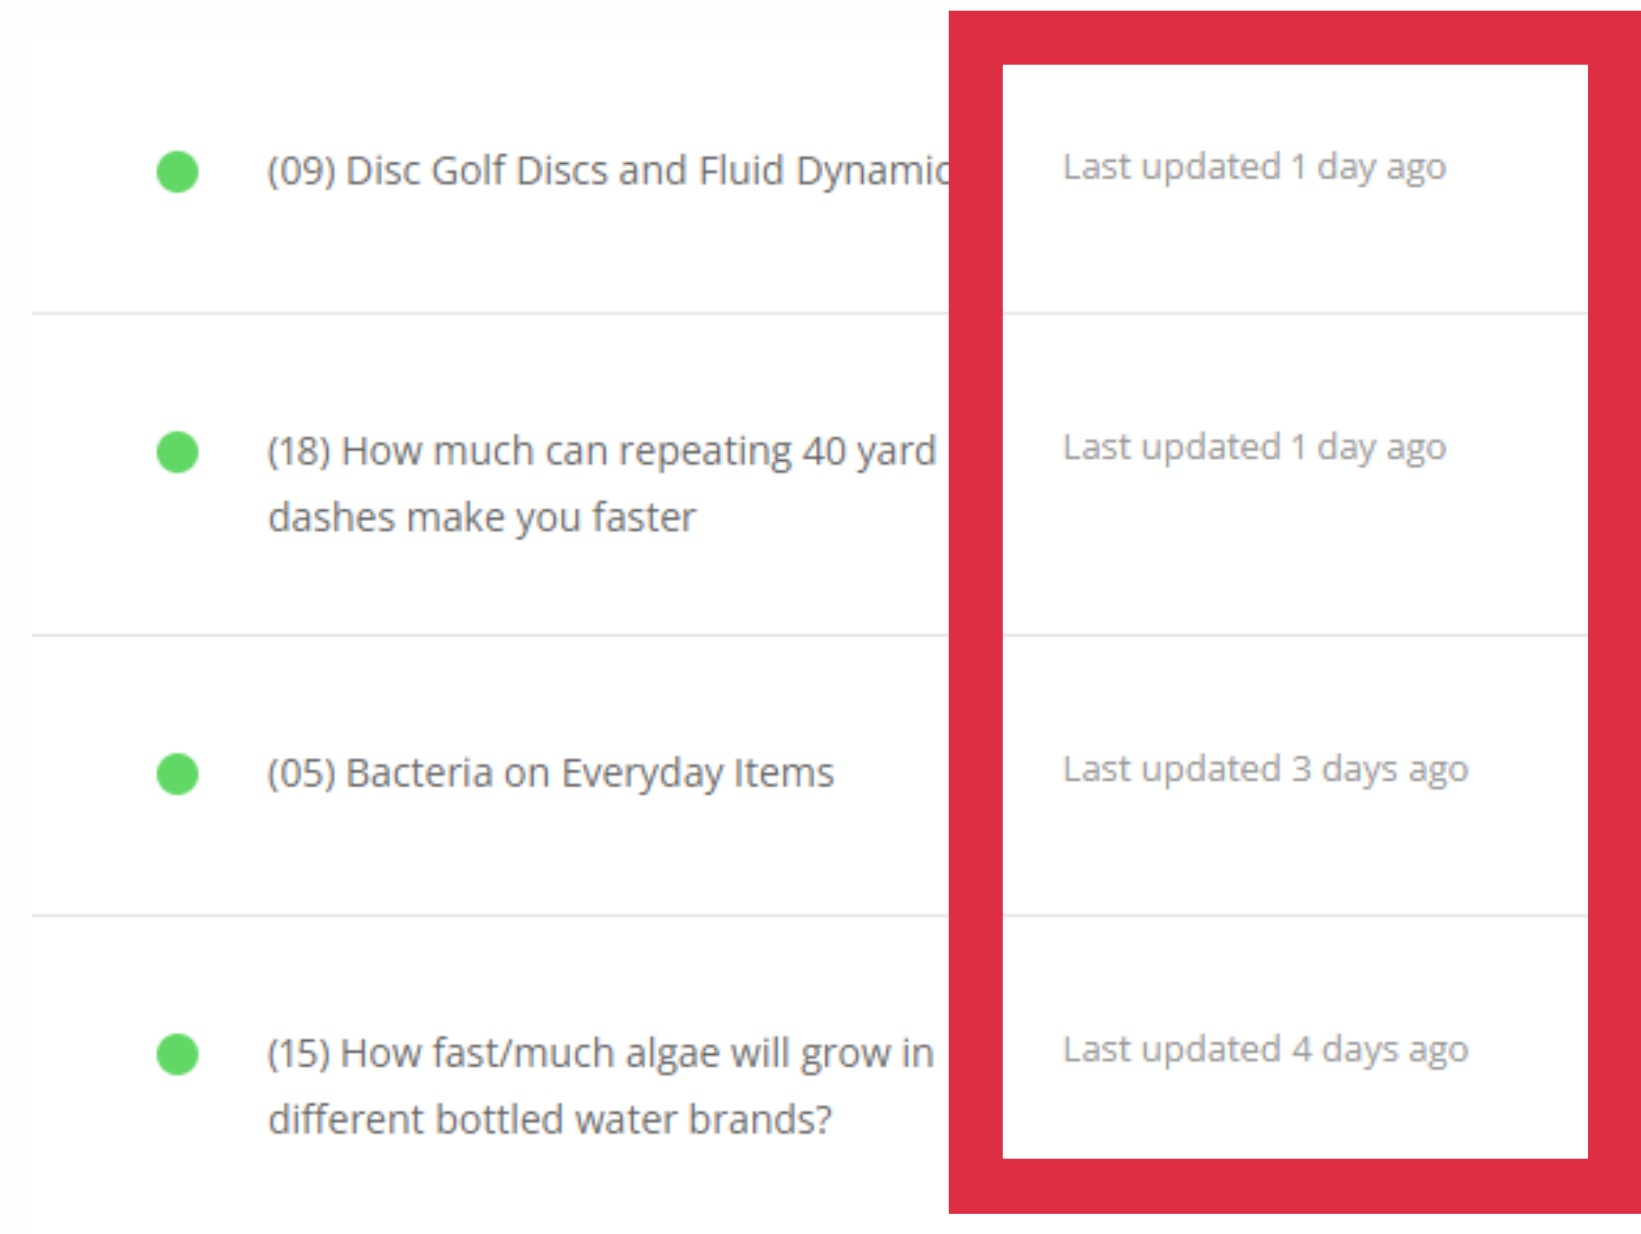

“I think what was important was that we identified a day that I would respond to any questions, or be available to meet. Once we did this, it made our communication pretty consistent.”

-Mentor, 2022-23

MONITORING ON MME

- Tracking project updates:
 - For a streamlined way to check which projects need communication reminders, you can check the bottom of the list
 - The projects will show how long it has been since the last update
 - Monitoring is a key responsibility! If ISTC notices there hasn't been communication in your projects, we will nudge both you and the mentor
 - Why is monitoring important? Consistency & Communication

The screenshot shows a list of four projects, each with a green dot icon, a title, and a 'Last updated' timestamp. A red rectangular box highlights the right side of the list, specifically the 'Last updated' column for all four entries.

(09) Disc Golf Discs and Fluid Dynamic	Last updated 1 day ago
(18) How much can repeating 40 yard dashes make you faster	Last updated 1 day ago
(05) Bacteria on Everyday Items	Last updated 3 days ago
(15) How fast/much algae will grow in different bottled water brands?	Last updated 4 days ago

MENTOR EXPECTATIONS

- Mentors attend 2 required training sessions
 - Best Practices, led by ISTC
 - Relationship building w/ Marisol Rodriguez
- Weekly communication & scheduling expectations
- Mentors are expected to stay on a project for the entire duration of the project

CPS VOLUNTEER PROCESS

ISTC

Distribute the CPS volunteer form and collect ID from mentors and provide that information to the volunteer coordinator at each CPS school

Teacher

Notify ISTC of any special information or protocol required for mentors to come in person

The Mentor Matching Engine

The Mentor Matching is an online platform that connects students and teachers with their partner company and mentors.

- 1 Teacher Onboarding
- 2 Onboarding Students
- 3 Student project Creation
- 4 Teacher Approval
- 5 Creating Groups
- 6 Tracking Weekly Communication

STUDENT ADVISORY BOARD

Goal:

- Student leadership and voice across ISTC programming

Timeline:

- 1-2 times per month, November-May

Meeting topics:

- Networking
- Development and Marketing
- Professional Writing
- Interviewing
- ISTC Special Projects

Applications will open now!

FINAL HIGHLIGHTS

01 **Communication!**

We are here for you! We can't fix a problem we don't know about--please let us know if there's anything we can support with!

03 **MME and Video Conferencing**

Both teachers AND students should be utilizing MME and video conferencing with mentors -- the more connections, the better!

02 **Toolkit**

We have created resources to help you along the way. Don't see what you need? Let us know!

04 **Student Advisory Board**

We are so excited for the return of our MME student advisory board! Please let your students know when applications open!

MENTOR PANEL

SPEAKERS:

Lucas Sardenberg

Toni Hawes

Andy Anderson

TEACHER CONTRACT

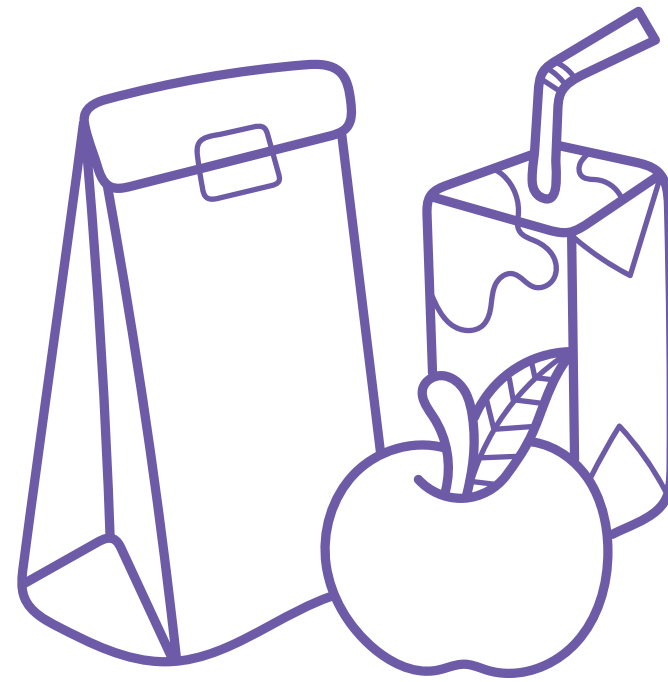

Please fill out your teacher contract! The contract will collect information on the following:

- What is the timeline for your classroom?
- Which days of the week will your class be communicating with mentors?

<https://tinyurl.com/stemistc>

LUNCH!

Please take 30 minutes to grab some food and get comfortable before we transition into our afternoon session!

"Fostering An Innovative Mindset"

Led by: Marisol Rodriguez

THANK YOU!

Welcome to the STEM Challenge program--we are so excited to get started with you all!

<https://tinyurl.com/stemistc>
